DRAINAGE WORK ON NH ROUTE 125 IN BARRINGTON
WILL REQUIRE LANE CLOSURES FOR THREE WEEKS

The New Hampshire Department of Transportation announces drainage work is scheduled to begin Tuesday, September 7, 2004 at three locations on NH Route 125 in Barrington.

Concrete drainage pipes will be laid across NH 125 in three locations between the intersection of Beauty Hill Road/Winkly Pond Road and south of the intersection with Province Road.

This work is expected to take three weeks to complete. Two lanes of traffic will be maintained during most of the work, but occasional one-way alternating traffic will be necessary. Flaggers and uniformed officers will help guide motorists through the work zones.

This work is part of an improvement project involving a 4.5-mile section of NH Route 125 in Lee and Barrington between the Lee Traffic Circle and NH Route 9 that includes drainage, guardrail upgrades and paving. Pike Industries, Inc. of Belmont, New Hampshire is the contractor for the \$1.8 million project, which has a final completion date of July 2005.
